### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 2 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Utterback (2,317,566).

With respect to claim 2, Utterback discloses a process for coking comprising:

a coker vessel (3) wherein the bottom portion (4) has an aperture/outlet (5) through which coke is released;

having an aperture closure (isolating valve 6) sealed to the outlet (5) at the bottom portion of the vessel (3);

feeding a hydrocarbon feed into the vessel (3) through a feed line (10) attached at a side position above the bottom of the coker vessel (see figures 1 and 2); and

wherein coking occurs in the vessel and wherein the valve is operated so that it is in a closed position during operation and in an open position at the end of the operation to release the coke (col. 1, line 48- col. 2, line 12).

With respect to claim 6, it can be seen in figure 1 that a chute (not numbered) is sealed between the bottom of closure/isolating valve (6) and a coke receptacle (7).

***Allowable Subject Matter***

3. Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

4. Applicant's arguments filed July 20, 2006 have been fully considered but they are not persuasive.

Applicant argues that the apparatus of Utterback is for spray coking and therefore cannot be a vessel for delayed coking.

The examiner respectfully disagrees. It can be seen in Gibson (6,270,656) that a delayed coking unit can also have a spray source for oil (col. 1, lines 56-59), such as that of the Utterback reference. Additionally, as recognized by applicant (page 5 of remarks), Utterback fails to disclose that the process is solely continuous. The rejection is maintained.

***Conclusion***

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 1764

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
